New WIRE-Net Member, Great Example of Expanding Footprint

Eight months ago Morrison Company of Willoughby became a WIRE-Net member because they "believe in the WIRE-Net mission and wanted to contribute to that mission." Evidence that our influence now reaches beyond Cleveland's west side community.

Morrison Company is a design engineer integrator of material handling systems. Based locally for 77 years, Morrison Company maintains a national and international presence with completed projects in 35 states, Canada, and Mexico. Morrison Company is also a tier-one distributor of Interlake racking systems, FKI Logistics conveyors, Demag cranes and hoists, and numerous other material handling manufacturers.

Morrison Company improves warehousing and manufacturing productivity by using their prestigious industrial material handling equipment and their professional design engineering services. As one of the top material handling distributors in the US, Morrison Company has a reputation of helping clients gain a competitive advantage. Their best-in-class clients include, Walgreens, CVS, AmerisourceBergen and Amway.

By maintaining a staff of degreed engineers, Morrison Company Owner and President, Jim Green, can boast membership in MEHEDA, IFMA, AIA, PRISIM, and NAIOP.

Morrison Company offers complimentary "Facility Assessments" to WIRE-Net members. Their tier-one status with major manufacturers also allows WIRE-Net members to purchase premier products at the most competitive price available.

To learn more about Morrison Company, visit their [website](#) or contact [Rob Neskey](#), Director of Advanced Business Development at 440.946.8505.
